PROFILE

Founder, designer and developer building digital products, AI workflows and visual identities. I work best where the problem is still becoming clear and the work needs to become real, legible and useful.

EDUCATION

Kalvium Bangalore, India
B.Tech, Computer Engineering Technology — Kalvium in partnership with Alliance University 2024 --- Present
• Focus: product systems, AI workflows, web development, interface design and early-stage business building

FOUNDER / INDEPENDENT WORK

Founder / builder 2025 --- Present
Kaisei Bangalore, India
• Building a Japanese-inspired digital studio for websites, web management, app development and brand systems.
• Work across product direction, UX structure, React / Next.js implementation, content systems, AI integrations and visual direction.

Full Stack Developer Aug 2025 --- Present
E-Cell Alliance University Anekal, India
• Helped build and currently manage a full-stack student virtual-currency e-commerce application.

Solo product builder 2026 --- Present
CreatorOS Bangalore, India
• Built an AI-powered SaaS platform for content creators from idea to production: 13 features shipped, 8 signups and 6 active beta users in the LinkedIn profile snapshot.

SELECTED PROJECTS

Product direction / full-stack build, Project JARVIS (theraj.live/projects/project-jarvis) 2025 --- Present
• Built a self-hosted AI assistant with 10+ active capabilities across voice I/O, PC control, WhatsApp automation, app launching, music control, file and web search, and Google Calendar access.

Product design / prototype build, Finstreak (theraj.live/projects/finstreak) 2026
• Designed 1 connected desktop and mobile financial prototype spanning CEO/CFO operating briefs, cash ledger, budgets, close readiness and a calmer phone-emulator flow.

Product design / web development, Skill 2 Role (theraj.live/projects/skill-2-role) 2026
• Built a learning product prototype that turns daily study into visible momentum through role pathways, progress states and a connected student experience.

SKILLS

- **Product:** Product direction, problem framing, MVP definition, prototyping, UX structure, brand direction
- **Development:** React, Next.js, TypeScript, Python, Tailwind CSS, APIs, full-stack builds, AI workflows, local LLMs and RAG
- **Practice:** UI/UX design, no-code automation, online content creation, digital marketing, photography, visual direction, technical writing and SEO foundations
- **Certifications:** Drone engineering workshop completion; The Legend of Python Masterclass; Masterclass on Robotics & AI

ADDITIONAL CONTEXT

- Born in Hyderabad; studied across 8 place chapters in India before moving to Bangalore for Kalvium.
